THE DAILY PRESS.

HONGKONG, AUGUST 1st, 1896.

From the minutes of the last meeting of the Committee of the Chamber of Commerce it will be seen that it was decided to address the Government and suggest the omission of returns of the trade of the port from the Harbour Master's report in future, on the ground that the figures given of certain imports, being only partial, are necessarily misleading. In the letter to be addressed to the Government the reasons on which this opinion is founded will no doubt be set out at length. We are at present in ignorance of what those reasons may be, but they will have to be strong ones to induce the Government to adopt the suggestion. The figures given by the Harbour Master must inevitably be incomplete in the conditions under which they have to be collected, but so far as they go they seem to be extremely useful and valuable. They afford a means of instituting a comparison between the trade of the port in one year and that in another; and although they may not be complete, the incompleteness will probably be about the same in different years and will therefore not vitiate the comparison. It seems to us most desirable that we should have some approximately reliable barometer of the trade of the port, such as that afforded by the Harbour Master's returns. The figures of the tonnage entering and leaving would be accepted for that purpose, but a few years ago we were assured that, though shipping like the Hongkong, an increase in the tonnage frequenting the port was comparable with declining trade. It is hardly necessary to dwell on the importance of knowing whether trade is really declining or expanding at any particular period. Any individual looking at the returns given in the Harbour Master's report might perhaps say that he did not see what use such figures could be to him in his own particular business, but to the community as a whole they appear to us to be very useful indeed. There can be little doubt now that the depression which commenced in 1889 and continued for the next three or four years, with its attendant financial stringency, was intensified by the exaggerated statements made concerning it, and that the colony suffered materially thereby. Had we had returns of the trade of the port at that time the information they would have given, showing that there was really no diminution in the volume of business, would have had a tendency to restore public confidence and make things better all round. To the Government such information must be invaluable; indeed, it is difficult to see how the administration of the public finances can be intelligently carried on without some means of gauging the state of trade, or how the requirements of the colony in the matter of public works of certain descriptions and the appropriate terms for entering upon expensive improvements can be properly determined. In his report on the Blue Book H.E. the Governor says the expectations he formed and gave expression to some four and a half years ago, "and which were then adversely criticized," and even treated in some quarters with "derision," have been or are in course of "being fulfilled." Instead of vague ex-

pectations put forward on the one side and decided on the other, they ought to be some standard to which all parties might refer when the commercial condition and prospects of the colony are in question. This the Harbour Master has attempted to supply, and although the figures collected by him may not be complete that does not seem a good reason for discontinuing the work. Even a defective barometer, though not so useful as a good one, may be of some service; and the defects being known they are not likely to mislead. The mercantile community of Hongkong does not want detailed statistics of the trade collected, or, it would perhaps be more correct to say, it does not want to supply such statistics, but we doubt if there is any strong objection to furnishing gross figures such as those collected by the Harbour Master and which are supplied voluntarily. The letter to be addressed by the Chamber of Commerce to the Government may place the matter in a different light, but at first view the Committee's recommendation does not strike us as discrepant.

THE LOSS OF THE "ILITIS."

FURTHER PARTICULARS.

(SPECIAL TELEGRAM TO THE "DAILY PRESS.")

SHANGHAI, 31st July.

Details of the loss of the German gunboat "Ilitis" have now come to hand. She left Shanghai on Thursday, the 22nd July, and the same day struck the rocks and broke in two. The bow remained above water, but the stern sank. Eleven men were rescued from the bow on Saturday and taken to the light-house. The remainder of the crew and all the officers went down with the after part of the vessel.

THE "HONGKONG" EXPERIENCES.

Captain Clarke, of the Hongkong, Canton and Macao Steamship Co.'s steamer "Hongkong," which left Hongkong on Wednesday afternoon on her usual trip to Macao, reports having anchored in North Lantau Channel and there experienced the typhoon. The squalls from the east and south-east were terrific between 8 p.m. and midnight, and one Chinese passenger on board died from the fright.

The lowest reading of the barometer was 28.69. At 5.30 a.m. on Thursday got under weigh and proceeded towards Macao. At 9.15, off the west end of Lantau, a Chinaman was rescued in a very exhausted condition from some wreckage; he was the only survivor out of a crew of ten.

Many large logs foundered along the coast of Lantau and no doubt many lives have been lost.

At Macao much damage has been done by the wind and sea. The whole of the Praia wall is more or less damaged and many houses have suffered, amongst others the Pos Yata Hotel, which sustained much damage to the roof. The draft in the Inner Harbour suffered a good deal and some lives were lost in spite of the ample warning given by the Harbour authorities.
